## EXPLANATORY NOTES

### *Symbols*

The following symbols have been used in the statistical tables:

- ... not available
- n.a. not applicable
- nil or negligible
- \* provisional figures, subject to revision

### *Sources*

These Summary Tables were prepared by the Secretariat in order to facilitate the work of the Council at its meeting in September 1996. The Secretariat based itself mainly on replies to questionnaires, other information submitted by parties and observers, as well as various information arising from the operation of the former Protocol Regarding Certain Milk Powders, the Protocol Regarding Milk Fat and the Protocol Regarding Certain Cheeses. Furthermore, the Secretariat used supplementary information available to it from various national and international sources, notably Zentrale Markt- und Preisberichtsstelle (ZMP) for milk production and deliveries, and documentation from the FAO, the OECD, the International Dairy Federation (IDF), the Commission of the European Communities, Agriculture Canada, the United States Department of Agriculture (USDA) and Agra Europe.

### *Notes relating to data of individual countries*

The data shown with respect to consumption, relate to apparent consumption, as calculated by the Secretariat.

Certain countries have not been included in all the tables either because the quantity of trade has been nil or insignificant, or because figures have not been available.

In *Table 1 - Milk Deliveries and Production*, quarterly figures are for milk deliveries to dairies, while yearly figures are shown for both deliveries and production. For Argentina, Japan and Uruguay, quarterly and yearly figures refer to production. Norwegian figures include goatmilk. Romanian figures include buffalo and sheep milk.

Figures for **Australia** for skimmed milk powder also include partially skimmed milk powder and buttermilk powder mixtures, and skimmed milk powder modified. Stocks are those held by manufacturers. Cheese stock figures only include Cheddar, Gouda and stirred curd/granular cheeses.

For **Bulgaria**, cheese figures include Kashkaval.

As of 1995, the data for the **European Communities** include those of Austria, Finland and Sweden. Stocks of skimmed milk powder and butter include public intervention stocks and private stocks. Cheese stocks include intervention stocks (public stocks for Grano-Padano and Parmigiano Reggiano) and stocks qualifying for aid for private storage.

For **Austria**, stocks include only products of domestic origin. Figures for skimmed milk powder also include buttermilk powder. Cheese consumption figures reflect sales of domestic produce only.

For **Finland**, stock figures refer to wholesale stocks of dairies.

Butter production figures for **Sweden** do not include "Bregott".

For **Japan**, stock figures for whole milk powder refer to stocks held by manufacturers, whereas for skimmed milk powder and butter, the data refer to stocks held by manufacturers and by the Livestock Industry Promotion Corporation. Production of processed cheeses includes those made from imported natural cheeses.

All stock figures for **New Zealand** include export and local market stocks. Government stocks are nil. Skimmed milk powder statistics include partially skimmed and cream powder. Whole milk powder statistics include infants' food.

For **Norway**, cheese figures include whey cheese and processed cheese.

Cheese figures for **Poland** include ripening and processed cheeses only.

Annual exports of milk powders for **Switzerland** include food aid, while quarterly exports do not. Butter figures include resolidified butter. Processed cheeses are not included in the statistics. Cheese stock figures include Emmental, Gruyère, Sbrinz, Tilsit and Appenzell.

For **Canada**, butter figures refer to creamery butter only; whey butter is not included. Cheese figures include Cheddar and other whole milk cheeses.

For the **United States**, export data on whole milk powder include partially skimmed milk powder, dry whole milk and cream.

The **IDA TOTAL**, calculated for the period 1992-94, refers to the statistics submitted by the participants to the former International Dairy Arrangement, superseded by the International Dairy Agreement since 1 January 1995.

Delegations wishing to suggest modifications or corrections, or to provide additional information, are requested to submit them to the Secretariat in writing as soon as possible.

## NOTES EXPLICATIVES

### *Signes*

Les signes suivants ont été utilisés dans les tableaux statistiques:

- ... chiffre non disponible
- n.a. sans objet
- néant ou quantité négligeable
- \* chiffre provisoire sujet à révision

### *Sources*

Les Tableaux récapitulatifs ci-après ont été établis afin de faciliter les travaux du Conseil à la réunion de septembre 1996. Ces Tableaux se fondent principalement sur les réponses aux questionnaires, les autres informations présentées par participants et observateurs, ainsi que sur les informations résultant de l'application des trois précédents Protocoles concernant certaines poudres de lait, les matières grasses laitières et certains fromages. D'autres sources nationales et internationales ont également été utilisées, notamment Zentrale Markt- und Preisberichtsstelle (ZMP) pour ce qui concerne la production et les livraisons de lait, la documentation en provenance de la FAO, l'OCDE, la Fédération internationale de laiterie (FIL), la Commission des Communautés européennes, le Ministère de l'agriculture du Canada, le Département de l'agriculture des Etats-Unis, et Agra Europe.

### *Notes relatives aux données concernant les différents pays*

Les chiffres concernant la consommation se rapportent à la consommation apparente, telle qu'elle a été calculée par le Secrétariat.

Certains pays ne figurent pas dans tous les tableaux, soit parce que le quantum des échanges était nul ou insignifiant, ou bien parce que les chiffres n'étaient pas disponibles.

Dans le *Tableau 1 - Livraisons et production de lait*, les chiffres trimestriels se rapportent aux livraisons de lait aux laiteries tandis que les chiffres annuels se rapportent à la fois aux livraisons et à la production. Pour l'Argentine, le Japon et l'Uruguay, les chiffres trimestriels et annuels se rapportent à la production. Les chiffres concernant la Norvège englobent le lait de chèvre. Les chiffres concernant la Roumanie englobent le lait de bufflonne et de brebis.

Pour l'**Australie**, les chiffres concernant la poudre de lait écrémé comprennent également la poudre de lait partiellement écrémé, la crème en poudre, les mélanges de poudre de lait écrémé et de poudre de babeurre, et la poudre de lait écrémé modifiée. Les stocks sont ceux détenus par les fabricants. Les stocks de fromages ne comprennent que le Cheddar, le Gouda et les fromages de caillebotte malaxée/granulés.

En ce qui concerne la **Bulgarie**, les chiffres concernant le fromage comprennent le Kashkaval.

Depuis 1995, les chiffres concernant la **Communauté européenne** comprennent l'Autriche, la Finlande et la Suède. Les stocks de poudre de lait écrémé et de beurre comprennent les stocks publics d'intervention et les stocks privés. Les stocks de fromages comprennent les stocks d'intervention (stocks publics en ce qui concerne le Grano-Padano et le Parmigiano Reggiano) et les stocks remplissant les conditions requises pour bénéficier d'une aide au stockage privé.

En ce qui concerne l'**Autriche**, les stocks ne comprennent que les produits d'origine nationale. Les chiffres pour la poudre de lait écrémé comprennent aussi la poudre de babeurre. Les chiffres relatifs à la consommation de fromage ne prennent en compte que les produits nationaux.

En ce qui concerne la **Finlande**, les chiffres des stocks se rapportent aux stocks de gros pour laiteries.

Pour la **Suède**, les chiffres de la production de beurre ne comprennent pas le "Bregott".

En ce qui concerne le **Japon**, les chiffres se rapportent aux stocks de poudre de lait entier détenus par les fabricants, alors que pour la poudre de lait écrémé et le beurre, les stocks sont ceux détenus par les fabricants et par la Société pour la promotion de l'élevage. Les chiffres de production de fromages affinés incluent la production à partir de fromages non-affinés importés.

En ce qui concerne la **Nouvelle-Zélande**, tous les chiffres des stocks comprennent les stocks exportables et les stocks des marchés locaux. Les stocks publics sont nuls. Les statistiques de la poudre de lait écrémé comprennent la poudre de lait partiellement écrémé et la crème en poudre. Les statistiques de la poudre de lait entier comprennent les aliments pour nourrissons.

En ce qui concerne la **Norvège**, les chiffres relatifs au fromage comprennent le fromage de lactosérum (petit-lait) et le fromage affiné.

Dans le cas de la **Pologne**, les chiffres relatifs au fromage ne comprennent que les fromages en maturation et les fromages affinés.

Dans le cas de la **Suisse**, les exportations de lait en poudre destinées à l'aide alimentaire sont comprises dans les totaux annuels, mais non dans les chiffres trimestriels. Les chiffres relatifs au beurre comprennent le beurre resolidifié. Les fromages affinés ne sont pas compris dans les statistiques. Les stocks de fromage comprennent l'Emmental, le Gruyère, le Sbrinz, le Tilsit et l'Appenzell.

Pour le **Canada**, les chiffres relatifs au beurre concernent uniquement le beurre de crèmerie; le beurre de lactosérum (petit-lait) n'est pas inclus. Les chiffres relatifs au fromage comprennent le Cheddar et autres fromages de lait entier.

En ce qui concerne les **Etats-Unis**, les exportations de poudre de lait entier comprennent le lait partiellement écrémé, le lait entier sec et la crème.

**IDA TOTAL**, calculé pour la période 1992-94, se rapporte uniquement aux statistiques fournies par les participants au précédent Arrangement international relatif au secteur laitier, remplacé depuis le 1er janvier 1995 par le présent Accord international sur le secteur laitier.

Les délégations qui souhaiteraient proposer des modifications ou des corrections, ou fournir des renseignements additionnels, sont invitées à les communiquer par écrit au Secrétariat aussi rapidement que possible.

## NOTAS EXPLICATIVAS

### *Signos convencionales*

En los cuadros estadísticos se han utilizado los signos que se indican a continuación:

- ... falta el dato
- n.a. no se aplica
- cantidad nula o insignificante
- \* cifra provisional, sujeta a revisión

### *Fuentes*

Los Cuadros Recapitulativos que figuran a continuación fueron elaborados por la Secretaría a fin de facilitar la labor del Consejo en su reunión de septiembre de 1996. La Secretaría se ha basado principalmente en las respuestas a los cuestionarios, en otros datos facilitados por las partes y observadores, y en diversa información derivada del funcionamiento de los antiguos Protocolo relativo a Determinados Tipos de Leche en Polvo, Protocolo relativo a las Materias Grasas Lácteas y Protocolo relativo a Determinados Quesos. Además, la Secretaría ha utilizado información complementaria procedente de diversas fuentes nacionales e internacionales, en particular, Zentrale Markt- und Preisberichtsstelle (ZMP) para la producción y entregas de leche, y documentación de la FAO, la OCDE, la Federación Internacional de Lechería (FIL), la Comisión de las Comunidades Europeas, Agriculture Canada, el Departamento de Agricultura de los Estados Unidos, y Agra Europe.

### *Notas relativas a los datos de distintos países*

Las cantidades indicadas en concepto de consumo se refieren al consumo aparente, calculado por la Secretaría.

Algunos países no figuran en todos los cuadros, ya sea porque la cuantía de su comercio ha sido nula o insignificante, o porque faltan las cifras.

En el *Cuadro 1 - Entregas y producción de leche*, las cifras trimestrales corresponden a las entregas de leche a las centrales lecheras, en tanto que las cifras anuales corresponden tanto a las entregas como a la producción. En el caso de la Argentina, El Japón y el Uruguay, las cifras trimestrales y anuales se refieren a la producción. Las cifras de Noruega incluyen la leche de cabra. Las cifras de Rumania incluyen la leche de búfala y de oveja.

Las cifras de la leche desnatada en polvo correspondientes a **Australia** incluyen también mezclas de leche parcialmente desnatada en polvo y suero de mantequilla en polvo, así como leche desnatada en polvo modificada. Las existencias son las mantenidas por los fabricantes. Las cifras de las existencias de queso abarcan solamente Cheddar, Gouda y cuajada agitada/quesos granulares.

En el caso de **Bulgaria**, se incluye el Kashkaval en las cifras del queso.

Desde 1995, los datos de la **Comunidad Europea** incluyen los Austria, Finlandia y Suecia. Las existencias de leche desnatada en polvo y mantequilla comprenden las existencias de intervención del sector público y las existencias del sector privado. Las existencias de queso incluyen las existencias

de intervención (existencias públicas de Grana-Padano y Parmigiano Reggiano) y existencias acreedoras a la ayuda para el almacenamiento privado.

Las existencias de **Austria** incluyen únicamente productos de origen nacional. En las cifras de la leche desnatada en polvo se incluye también el suero de mantequilla en polvo. Las cifras correspondientes de consumo de queso abarcan sólo las ventas de productos nacionales.

Las cifras de las existencias de **Finlandia** se refieren a las existencias al por mayor de las centrales lecheras.

Las cifras de la producción de mantequilla de **Suecia** no incluyen "Bregott".

Con respecto al **Japón**, las cifras de las existencias de leche entera en polvo se refieren a las en manos de los fabricantes, mientras que en el caso de la leche desnatada en polvo y la mantequilla, los datos corresponden no sólo a las existencias mantenidas por los fabricantes sino también a las de la LIPC (Corporación de Fomento de la Industria Pecuaria). La producción de queso fundido incluye la del fabricado con quesos naturales importados.

En todas las cifras de las existencias de **Nueva Zelandia** figuran las existencias para la exportación y las destinadas al mercado interno. Las existencias oficiales son nulas. En las estadísticas de la leche desnatada en polvo figuran también la leche parcialmente desnatada y la crema en polvo. Las estadísticas de la leche entera en polvo incluyen los alimentos para lactantes.

Las cifras de **Noruega** referentes al queso incluyen el queso de suero y el queso fundido.

En el caso de **Polonia**, las cifras del queso comprenden únicamente los quesos de maduración y fundidos.

Las cifras anuales de exportaciones de leche en polvo correspondientes a **Suiza** comprenden las operaciones de ayuda alimentaria, pero estas exportaciones no se incluyen en las cifras trimestrales. Las cifras de mantequilla incluyen la mantequilla resolidificada. Los quesos fundidos no están incluidos en las estadísticas. Las existencias de queso comprenden Emmental, Gruyère, Sbrinz, Tilsit y Appenzell.

Las cifras de **Canadá** relativas a la mantequilla corresponden únicamente a la mantequilla de mantequería; no se incluye la mantequilla de suero. Las cifras de los quesos abarcan el Cheddar y otros quesos de leche entera.

Los datos de los **Estados Unidos** sobre las exportaciones de leche entera en polvo incluyen también las de leche parcialmente desnatada en polvo y las de nata en polvo.

El **IDA TOTAL**, calculado para el periodo 1992-94, se refiere a estadísticas presentadas por los participantes en el antiguo Acuerdo, reemplazado por el presente Acuerdo Internacional de los Productos Lácteos a partir del 1 de enero de 1995.

Se ruega a las delegaciones que deseen sugerir modificaciones o correcciones, o facilitar información adicional, que se dirijan por escrito a la Secretaría lo antes posible.
